Vocabulary
Body Parts I: Basic Head and Face

Basic Rules:
- Body part words must take a Pronomial to indicate *whose* body part your'e talking about (i.e, "possession").
- Body part words can use *either* Set A *or* Set B. Some body parts are Set A, some are Set B. You just have to memorize which is which.
- Body Parts that use Set A can use either /a^2/ or /g/ in the 3rd Person Singular. This is based on Kituwah perceptions of how prominent or attention-grabbing the body part is—a person's head /a^2/ is more prominent than their shoulder /g/, for example.
- Body parts are pluralized like other Nouns, with the Unreal Distributive /di^{22}(?)/.
